Carbon Fiber Materials & Custom Composite Solutions

Lightweight Strength. Precision Made.

About Us

One-Stop Carbon Fiber Solutions

Carbon Fiber Materials

Sheets, tubes, rods, fabric, plates, strips, and raw materials.

Custom Processing

CNC cutting, drilling, slotting, chamfering, engraving, shaping, and surface treatment.

Custom Parts

Special-shaped parts, structural parts, decorative parts, brackets, panels, frames, and components.

Finished Products

Lifestyle carbon fiber products, accessories, gifts, sports components, automotive parts, and customized consumer products.

OEM / ODM Services

From sample development to batch production, we support customers with flexible manufacturing solutions.

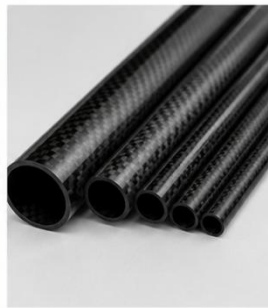

Flexible Customization

We support custom thickness, size, shape, surface finish, fiber pattern, logo, packaging, and product structure according to customer requirements.

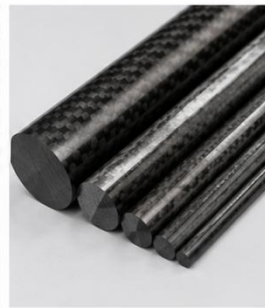

Product Range

Carbon Fiber Sheets

Carbon Fiber Tubes

Carbon Fiber Rods

Carbon Fiber Fabric

Carbon Fiber Plates / Strips

Raw Materials

Custom Machined Parts

Finished Products

Product Category	Main Products	Custom Options
Carbon Fiber Sheets	Flat sheets, panels, plates	Thickness, size, surface, pattern, CNC machining
Carbon Fiber Tubes	Round tubes, square tubes, rectangular tubes	Diameter, wall thickness, length, finish
Carbon Fiber Rods	Solid rods, pultruded rods	Diameter, length, surface
Carbon Fiber Fabric	Plain weave, twill weave, unidirectional fabric	Weight, width, weave, roll length
Carbon Fiber Plates / Strips	Thin plates, strips, decorative pieces	Shape, thickness, surface, logo
Raw Materials	Carbon fiber fabric, composite materials	Based on actual supply range
Custom Machined Parts	CNC parts, brackets, frames, panels	Drawing-based production
Finished Products	Lifestyle products, accessories, OEM products	Design, branding, packaging

Carbon Fiber Sheets

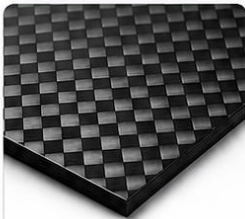

Lightweight. Rigid. Strong. Customizable.

They provide excellent strength, stiffness, corrosion resistance, fatigue resistance, and premium carbon fiber appearance.

Types of Carbon Fiber Sheets

By Weave • By Surface • By Application

1. By Weave

**Plain Weave
Carbon Fiber Sheet**

Balanced weave

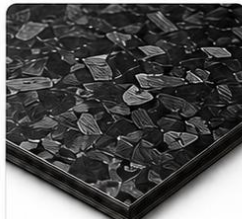

**Twill Weave
Carbon Fiber Sheet**

Diagonal weave

**Unidirectional
Carbon Fiber Sheet**

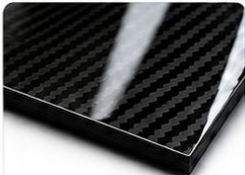

One-direction fibers

**Forged Carbon
Fiber Sheet**

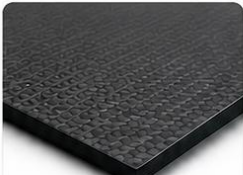

Marbled finish

2. By Surface

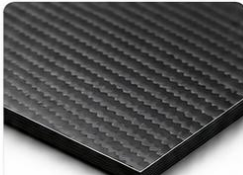

**Glossy
Carbon Fiber Sheet**

High gloss

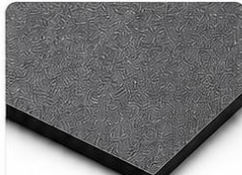

**Matte
Carbon Fiber Sheet**

Low reflection

**Semi-Matte / Satin
Carbon Fiber Sheet**

Soft sheen

**Sanded
Carbon Fiber Plate**

Textured surface

3. By Application

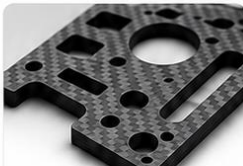

**Structural
Carbon Fiber Plate**

Load-bearing

**Decorative
Carbon Fiber Sheet**

Interior trim

**CNC Machined
Carbon Fiber Sheet**

Precision parts

**Cut-to-Size
Carbon Fiber Sheet**

Custom size

Custom Carbon Fiber Sheet Processing

We provide customized processing services for carbon fiber sheets and plates according to customer drawings, samples, or application requirements.

Processing Capabilities

Common Custom Parts

Drone Frames

Robotics Panels

Automotive Decorative Panels

Industrial Brackets

Mounting Plates

Electronic Product Panels

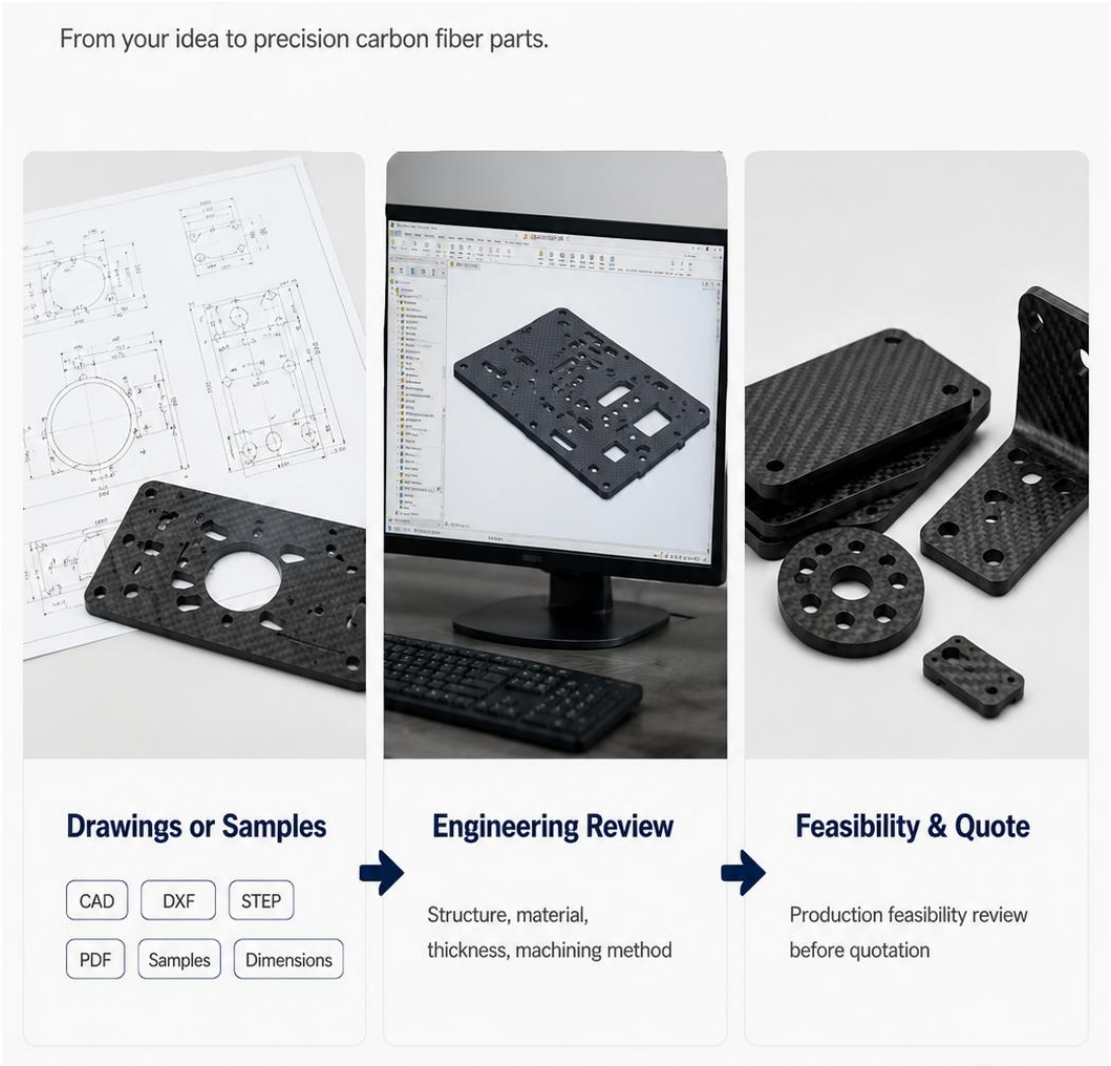

Tooling Fixtures

Carbon Fiber Accessories

Cooperation Method

Carbon Fiber Tubes

High strength, low weight, excellent structural performance.

Carbon fiber tubes are suitable for applications requiring lightweight support, high rigidity, corrosion resistance, and clean appearance.

Types of Carbon Fiber Tubes

Types & Applications

Lightweight, strong and versatile tubing solutions.

1 By Process

Roll-Wrapped Tube
High stiffness

Pultruded Tube
Straight & economical

Filament Wound Tube
For torsion

2 By Shape

Round

Square

Rectangular

Oval / Special

3 By Surface Pattern

3K Twill

Plain Weave

UD

4 By Application

Structural

Telescopic

CNC Cut

Decorative

Lightweight

High Strength

Corrosion Resistant

Custom Machining

Carbon Fiber Rods

Carbon fiber rods provide high strength, high stiffness, and low weight. They are commonly used in model aircraft, kites, tents, sports equipment, lightweight structures, support rods, guide rods, and industrial applications.

CARBON FIBER RODS

TYPES & APPLICATIONS

1. BY MANUFACTURING PROCESS

PULTRUDED ROD
High straightness
Excellent strength

ROLL-WRAPPED ROD
Premium appearance
High strength

TWILL OVERWRAP ROD
Twill surface
Great for visual parts

2. BY SHAPE

ROUND

SQUARE

RECTANGULAR

HALF ROUND

OVAL / SPECIAL

3. BY SURFACE PATTERN

3K TWILL

PLAIN WEAVE

UD (UNIDIRECTIONAL)

MATTE FINISH

4. BY APPLICATION

STRUCTURAL
Drones, robotics, frames

REINFORCEMENT
Models, strengthening, support

SPORTS EQUIPMENT
Fishing rods, golf shafts, training gear

CNC CUT
Cut to length, drilled, slotted, chamfered

Carbon Fiber Fabric

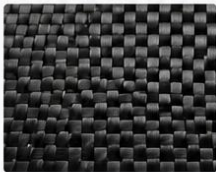

Carbon fiber fabric is widely used for composite layup, reinforcement, surface decoration, product molding, sports equipment, automotive accessories, industrial structures, and custom composite manufacturing.

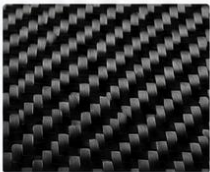

CARBON FIBER FABRIC

TYPES & APPLICATIONS

**BY WEAVE STYLE**

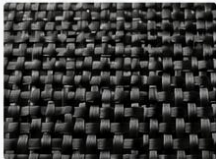

PLAIN WEAVE

TWILL WEAVE

SATIN WEAVE

UNIDIRECTIONAL (UD)

**BY FABRIC STRUCTURE**

BIAXIAL (0°/90°)

MULTIAXIAL (±45°)

SPREAD TOW

HYBRID

**BY TOW SIZE**

3K

6K

12K

**BY SUPPLY FORM**

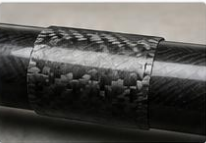

DRY FABRIC

PREPREG

**BY APPLICATION**

STRUCTURAL

DECORATIVE

REPAIR

HIGH TEMPERATURE

Carbon Fiber Raw Materials

We provide carbon fiber raw materials for composite manufacturers, processing factories, product developers, and industrial customers.

Our material supply can support different requirements for strength, appearance, layup structure, fiber direction, and production volume.

Product Options

1 Carbon Fiber Fabric
Woven Reinforcement

2 Carbon Fiber Cloth Rolls
Roll Supply

3 Composite Materials
Laminated Solutions

4 Carbon Fiber-Related Raw Materials
Industrial Raw Inputs

5 Other Available Materials
Available on Request

APPLICATIONS

Carbon Fiber Use Cases

1. Composite Layup

2. Structural Reinforcement

3. Surface Decoration

4. Molded Carbon Fiber Products

5. Industrial Composite Components

6. Sports Equipment

7. Automotive Parts

8. Consumer Products

Lifestyle Carbon Fiber Plates / Carbon Fiber Pieces

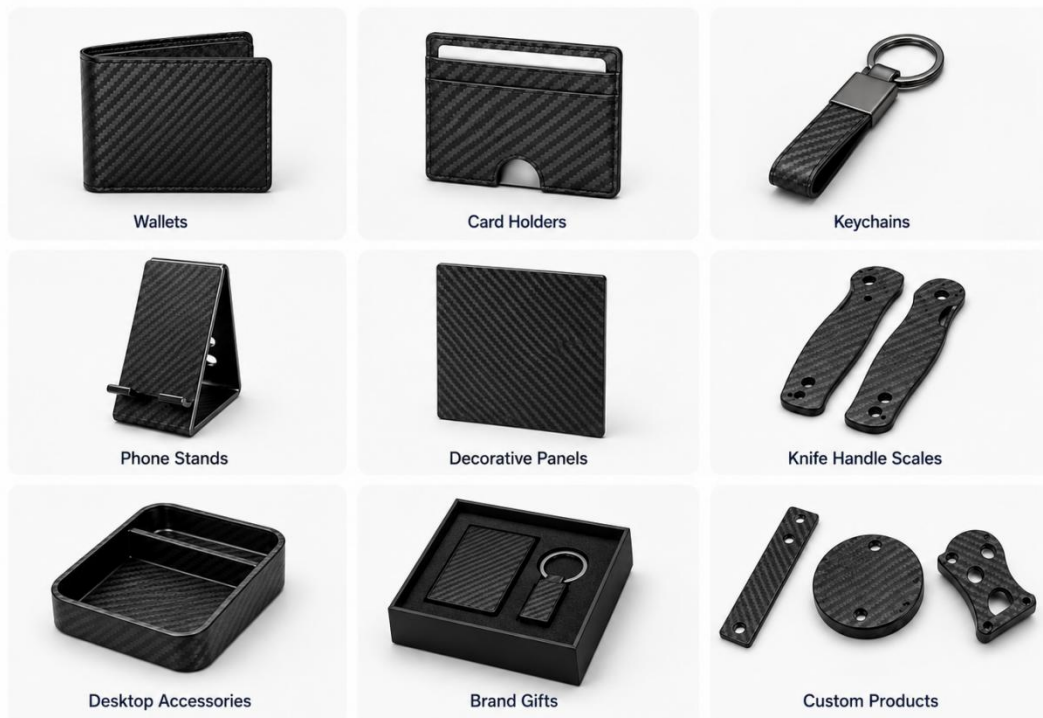

Premium texture for modern lifestyle products.

Carbon fiber is not only a high-performance engineering material, but also a premium visual material for consumer products, gifts, accessories, and lifestyle applications.

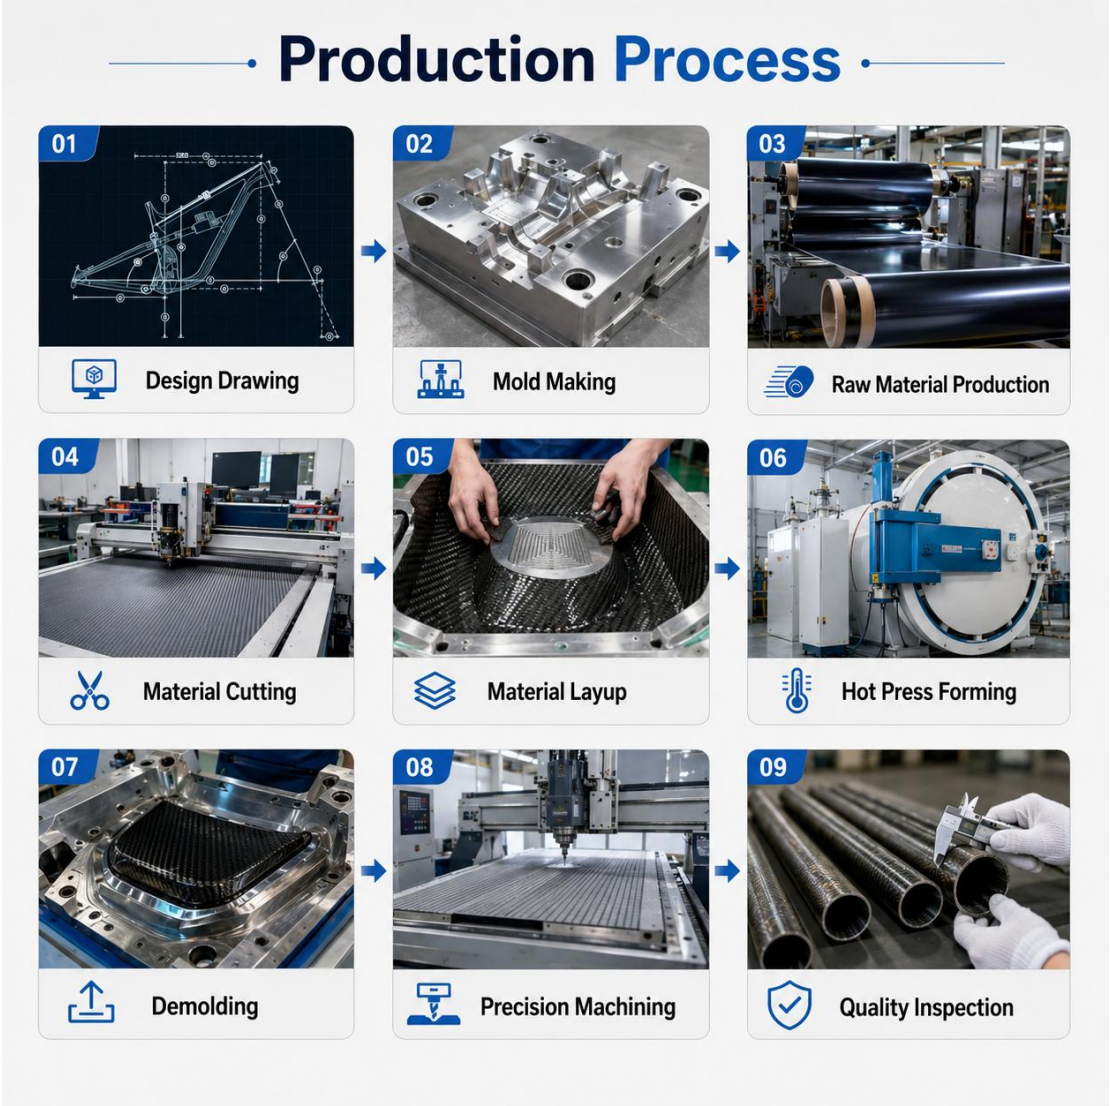

Our lifestyle carbon fiber plates and pieces can be used for wallets, card holders, keychains, phone stands, decorative panels, knife handle scales, desktop accessories, brand gifts, and customized carbon fiber products.

Item	Options
Shape	Rectangle, round, special shape, custom design
Thickness	Custom or standard thickness
Surface	Glossy, matte, semi-matte
Pattern	Plain weave, twill weave, custom appearance
Logo	Laser marking, printing, engraving, depending on product
Packaging	Standard packaging or customized gift packaging
Service	OEM / ODM available

Typical Lifestyle Applications

Production Process

Production Equipment

Production Equipment

Film Production Equipment

Automated Cutting Table

Large Scale Production Line

CNC Router / Machining Center

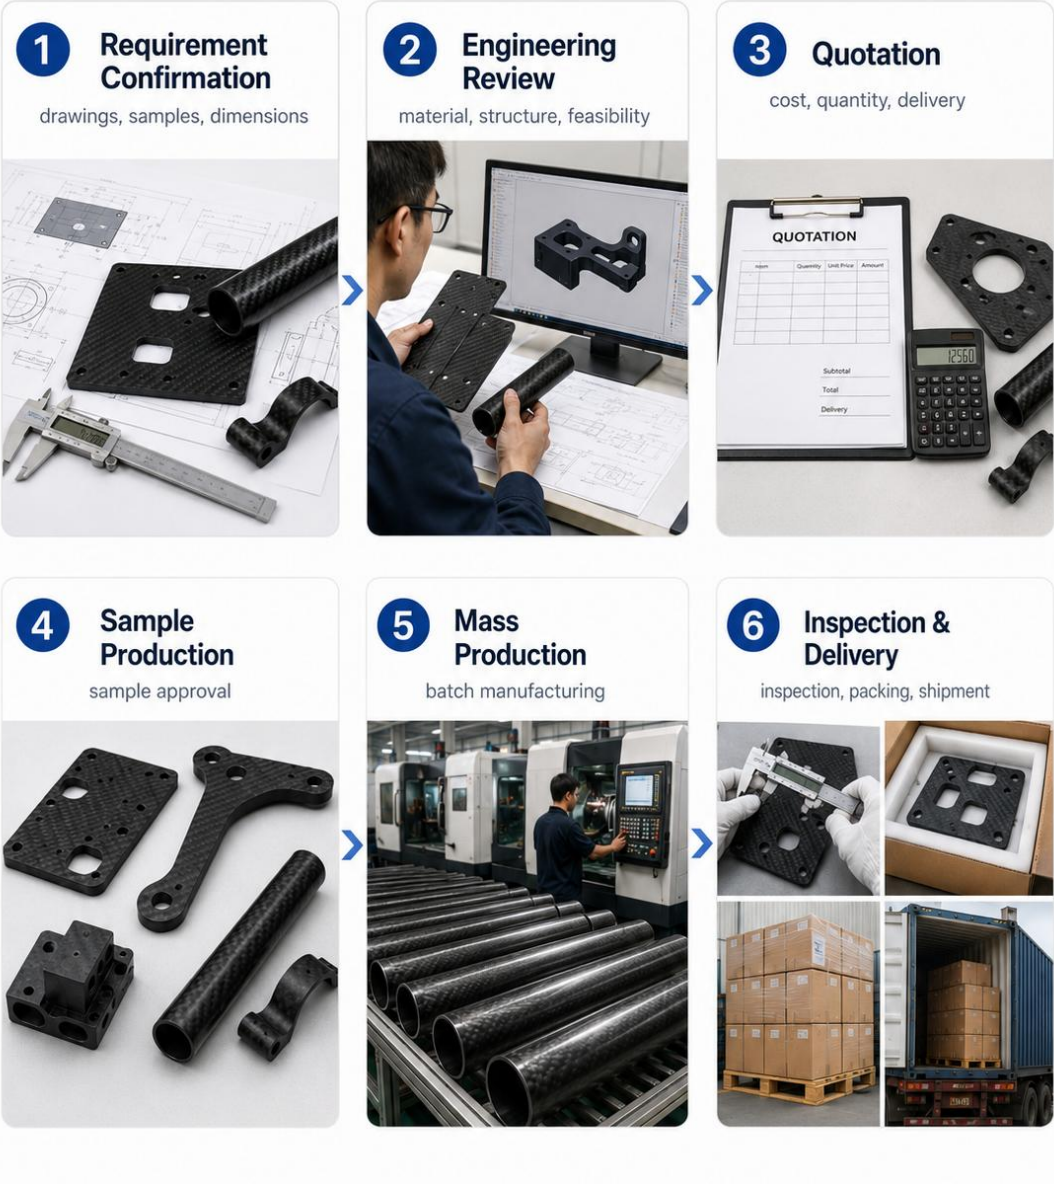

Autoclave / Pressure Vessel Equipment

Workshop Machining Equipment

Custom Order Process
